Web Enabled Attendance & Access Control Terminal **BioWeb - B3**

BioFinger-Mini is high end biometric based access controller that can not only work in the standalone mode without need of a host PC, but also easily integrates to BioFinger (multi doors controller) as a reader. Unmatched usability combined with ultra-fast identification speed allows system implementation with no other identification token required. Besides this, it includes relay to control lock and auxiliary devices along with to exit input and door alarm input. Web Based access control software is built in.

Fingerprint	RFID Card	Access Control	USB Host	TCP / IP	Web

AT A GLANCE

Verification options :	Fingerprint, 32768 transactions storage Fingerprint + Card, Fingerprint + Mifare/RFID and HID reader Pin, Card + Pin, Fingerprint + support Card + Pin
Verification mode	1:1/1:N
Verification time :	< 1 sec
Communication interface:	RS232, RS485, USB (optional) and TCP/IP
Capacity is:	1900 Templates
transactions storage	32768
reader support	Mifare/RFID and HID
WG	output support / Fire alarm support
